PROFESSIONAL SUMMARY

Graduate in Applied Business Informatics with hands-on experience building full-stack web applications, REST APIs, and responsive frontend interfaces. Passionate about data analytics, Artificial Intelligence, and Deep Learning. A fast learner with a strong drive for continuous improvement, seeking to leverage a solid technical foundation within a growth-oriented environment.

TECHNICAL SKILLS

Frontend	Fullstack	Data & Tools
HTML5 & CSS3	Laravel / PHP	Python
JavaScript	Node.js	Data Visualization
React & Vite	MySQL & MongoDB	Git & GitHub
Tailwind CSS	REST APIs	VS Code · Vercel

PROJECTS

Pharmacie de l'Espoir — Fullstack Pharmacy Management System ↗ GitHub

[Fullstack] Tech: Laravel 13, PHP 8.3, MySQL, Bootstrap 5, REST API, DomPDF

Built a complete pharmacy management system for a real pharmacy in Goma, DRC. Features include medicine inventory with low-stock alerts, automatic PDF invoices with 16% DRC VAT, Excel import/export, a secured REST API for partner clinics (CBCA, Heal Africa), and role-based access control (admin, pharmacist, cashier).

Hatua Collection — Fullstack E-Commerce Platform ↗ Live

[Fullstack] Tech: React, Vite, Node.js, REST API, MongoDB

Designed and developed a complete e-commerce platform for a fashion brand, including product catalog, cart management, and a Node.js backend deployed on Render.

Analytics Dashboard — Frontend ↗ Live

[Frontend] Tech: React 18, Chart.js, Vite, CSS

Built an interactive dashboard featuring dynamic KPI cards, bar charts, and line charts with real-time data rendering using Chart.js.

Weather App — Frontend ↗ Live

[Frontend] Tech: React, Vite, OpenWeather API

Real-time weather application with location-based forecasts, dynamic backgrounds, and a clean responsive UI.

Image Search App — Frontend ↗ Live

[Frontend] Tech: React, Vite, Unsplash API

Responsive image search tool consuming a public API with paginated results and keyword filtering.

Task Manager — Frontend ↗ Live

[Frontend] Tech: JavaScript, HTML5, CSS3

Task management application with full CRUD functionality, local storage persistence, and priority filtering.

EDUCATION

Bachelor's Degree in Applied Business Informatics — **Graduated 2024**

ISIG/GOMA — Institut Supérieur d'Informatique et de Gestion

LANGUAGES

French (Native) **English** (Intermediate)

FOCUS AREAS & INTERESTS

- Artificial Intelligence & Machine Learning — Deep interest in neural networks, Deep Learning architectures, and AI-driven applications.
- Data Analytics — Eager to master data cleaning, exploratory analysis, and predictive modeling pipelines.
- Fullstack Development — Building scalable, production-ready applications with clean architecture and secure APIs.
- Continuous Learning — Actively following AI research, attending online courses, and contributing to personal projects.
